Patent NO. USAULTINE
GENERAL INFORMATION:
SERVICIONIS 1801 APPLICANT: YAN, Chunhua et al.
TITLE OF INVENTION: ISOLATED HUMAN RAS-LIKE PROTEINS,
TITLE OF INVENTION: NUCLEIC ACID MOLECULES ENCODING THESE HUMAN RAS-LIKE
TITLE OF INVENTION: PROTEINS, AND USES THEREOF
FILE REFERENCE: CL001220
CURRENT APPLICATION NUMBER: US/10/118,328
CURRENT APPLICATION DATE: 2002-04-09
                                                                                                                                                                                                                                                                                                             ş
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                US-09-738-626-6059; Application US/09738626; Publication NS-0020020197605A1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            밁
